Køkken—29.10.18

Vælg det rigtige materiale til dit nye køkken

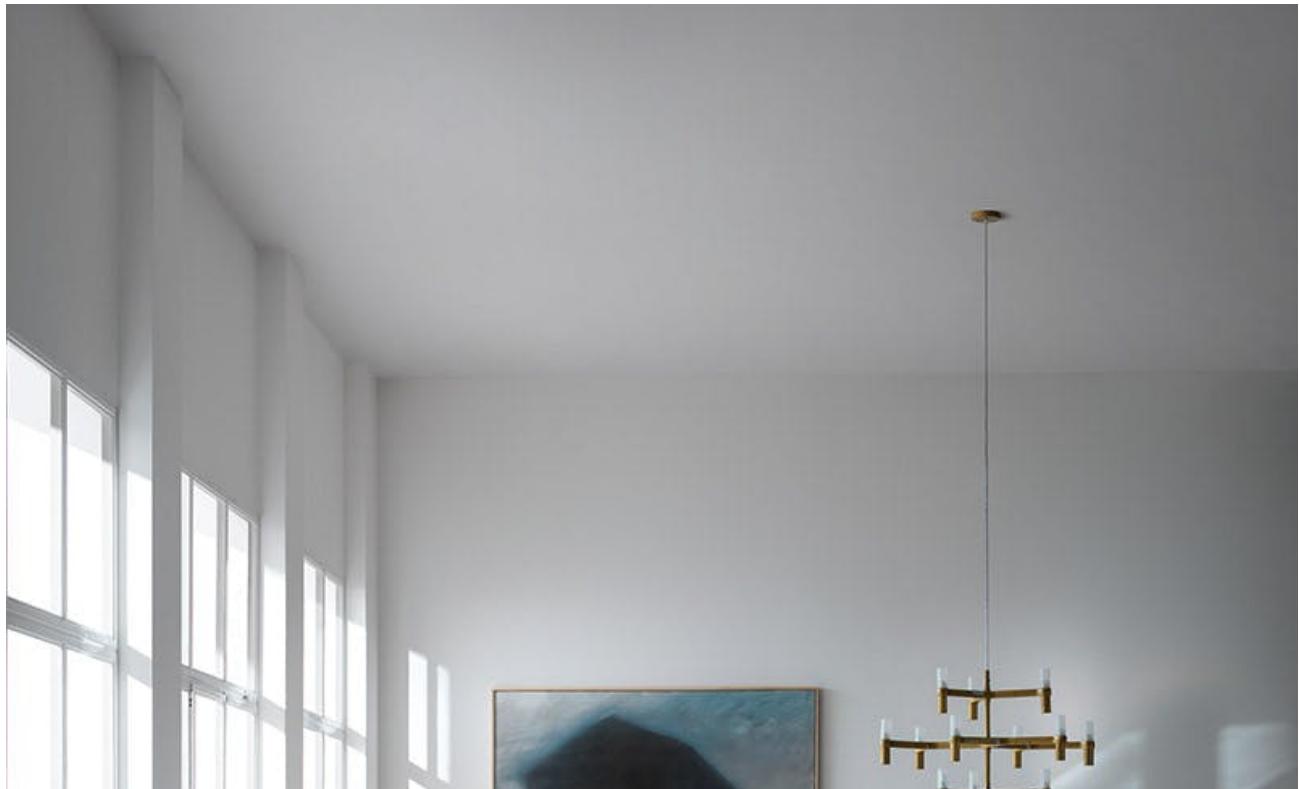

Sten, stål eller træ - eller måske en blanding af de tre.

Tekst — Trine Jørck

Renovering

Alt i Én. Alpes Inox laver køkkenmoduler, som indeholder alt fra vand, kogeplade, opvaskemaskine, opbevaring, køleskab osv. Man kan vælge sit køkken med de elementer, som man har brug for, og i forskellige størrelser. Køkkenet er designet af Nico Moretto.

© Abimis

Det professionelle hjemmekøkken. Abimis' køkkener har en masse funktioner integreret, som gør livet i køkkenet lettere. Fx er der et køleelement ved affaldssektionen, så man undgår uheldige dufte, en skuffe til at holde tallerkener varme, en skuffe til frostvarer osv.

RASHLADNI SISTEM KOMPANIJE ABIMIS

Kvalitetni recepti zahtjevaju kvalitetne sastojke...

U našem slučaju radi se o modelu koji omogućuje čuvanje hrane i pruža veliku vrijednost generalnom činu kuhanja, posebno u slučaju kada se ono pridržava svih fundamentalnih pravila vezanih za higijenu, zdravlje i sigurnost.

Tokom događaja Salone del Mobile 2018., kompanija Abimis predstavila je svoj novi sistem za čuvanje namirnica u vidu Cold Control System, frižidera iz visokotehnološke linije potpuno prilagođivih jedinica, koje mogu biti modificirane u terminima finisa, veličine i konfiguracija, koje su unikatno određene i komponirane radi lakšeg pristupa eksterinim panelima, omogućujući modulaciju temperature u različitim odjeljima, čij se status može pratiti svo vreme.

Zahvaljujući novom Cold Control System frižideru, koji na najbolji način koristi tehnologije implementirane na velikoj skali u cesterni industriji, kompanija Abimis nastavlja sa svojim planom unošenja svjetskih profesionalnih kuhinja u domaće uvjete, čimeći svakodnevni čin kuhanja unikatnim u privatnim domovima, najboljim i najpouzdanijim instrumentima.

Pojava, jednostavnosti i mukane siluete, zajedno sa materijalima kao što je AISI 304 nehradajući čelik, ostaju identični kao i u ostalim Abimi kuhinjama. Pristup zdravju i higijeni ostaje također ključna stavka, kao i u svim linijama ovog brenda, obilježenim strukturim standardima, savršeno uklapljenih i funkcionalnih vrata, bez oštirih rubova, zaduženih za sprečavanje prodira bakterija i prijevira, uokvirujući čitav proces čišćenja.

Cold Control System frižideri sastoje se od više odjeljenja, od kojih je svako odvojeno od sljedećeg i funkcionira pod različitim temperaturama, u dizajnu kreirano radi pametnog, savršeno organiziranog čuvanja hrane, na primjer, mesa i ribe odvojenih od povrća, voća, mlijeka i slično, radi izbjegavanja kontaminacije. Sve police unutar ovih uređaja mogu biti izvučene kako bi osigurale maksimalnu pristupačnost i poboljšale prostornu organizaciju. Posljednje, ali ne i najmanje važno jeste to što unutar komora postoji ventilacioni sistem koji garantira identične temperature širom frižidera.

The cover features a large, bold title 'ELLE DECORATION' in red letters, partially obscured by green ivy. Below it, the word 'CASAS' is written in large red letters, followed by 'DE VERANO' in white. To the left, there's a vertical column of text: 'COMO LOGRAR LA MEJOR VERSION' and 'CASA DE VERANO'. On the right, there's more text: 'PAREDES ABERTURAS MUEBLES ACCESORIOS A TODO COLOR', 'JUJUY ESTILO AUTOCTONO + GUIA DE LUGARES Y PASEOS', and 'ESPECIAL COCINAS TODAS LAS TENDENCIAS'. At the bottom, the word 'exteriores' is written in red, followed by 'INSPIRACIONES PARA DISFRUTAR DEL AIRE LIBRE'. The background shows a bright, airy room with a long white table set for a meal, surrounded by wicker chairs with light blue cushions. A large, round, light-colored pendant lamp hangs above the table. The overall theme is summer living and outdoor cooking.

24 de octubre de 2018 16:53

Con motivo del Salone del Mobile 2018, la firma aborda esta importante fase de conservación presentando un novedoso sistema de control de frío.

Se requieren ingredientes de calidad para una receta de calidad. En este sentido, es inevitable que la fase de conservación de los alimentos adquiera un valor indiscutible en el acto de cocinar, y especialmente si se diseña en relación con las cuestiones fundamentales de higiene,

Abimis lanza un nuevo sistema de control de frío

24/10/18 09:19

salud y seguridad. Con motivo del **Salone del Mobile 2018**, Abimis aborda esta importante fase de conservación presentando su sistema de control en frío, una colección tecnológica de unidades altas refrigeradas que son totalmente personalizables en términos de acabado, tamaño y configuración, que se han renderizado. Es un sistema único por un panel externo de fácil acceso que permite la modulación de la temperatura en los distintos compartimentos y la supervisión del estado en cualquier momento.

Gracias a su Sistema de control en frío, que explota las tecnologías implementadas en la industria de la restauración colectiva a gran escala, Abimis continúa con su plan de **unir el mundo de la cocina profesional con el uso doméstico**, para hacer que el hecho cotidiano de cocinar sea único también en el hogar. Con los mejores y más fiables instrumentos.

По теме: [Белые кухни: 30 решений](#)

Гармония серых оттенков Из камня и стали монохромные композиции нейтральных оттенков служат общему тренду — они буквально растворяются в обширных кухнях-гостиных, не притягивая к себе излишнего внимания. Популярный микроцемент или шпон брашированного дерева могут быть изысканных жемчужных оттенков, которые понравятся личностям любого пола.

10/10

Кухня Inox AISI 316, диз. Ufficio Progetti, Abimis.

Новые дизайнерские модели построены на миксе материалов, светлые кухонные композиции разнообразят фартуки из темного мрамора со светлым рисунком вен, а рабочие острова из дерева хорошо дополняют стальные столешницы и мойки. Главный тренд — модульная универсальная мебель и системы с открытыми мобильными полками, которые позволяют кастомизировать модели.

Интеллектуальная жизнь

Выстоит!

Любителям минимализма и брутальных вещей понравится стол Euclide от Forma&Cemento из бетона с металлической структурой и асимметричными ногами, который можно использовать как дома, так и на улице. Его поверхность защищена от пятен и обладает большим запасом прочности. Диз. Valerio Ciampicacigli. Размеры: 250x120, 200x100 см.

www.forma-cemento.it

Стальной характер

Кухня Ego от Abimis для любителей брутальных вещей, нерожающей стали и чистого функционала. Один материал, чистые линии, практичность, возведенная в идеал. Дизайн Alberto Torsello

www.abimis.it

Свобода выбора

Кухни от дизайнера Piero Lissoni для компании Boffi – это непрерывная комбинаторика массы элементов, основной из которых – моноблок, позволяющих создать не только индивидуальную кухню, но и пространство вокруг нее.

На контрасте

Обеденный стол Mikado от Reflex – это сочетание материалов, которые обычно ассоциируются с совершенно противоположными качествами. Стальное основание – с надежностью, стеклянная столешница – с хрупкостью. Хотя на деле современное закаленное стекло толщиной 15 мм по прочности не уступит.

www.reflex.it

Kitchen counter top trends for every budget

Best in class: Seven kitchen surface trends you might like to try

Sat, Oct 13, 2018, 00:00

Alanna Gallagher

Corian

HD BIC
Kitchen
counters
Corian

Kitchen countertops are now available in a dizzying array of options but Corian, one of the original new materials continues to offer some one of the most interesting ranges in terms of its colour and patterns and also its malleability. Pictured is a sparkling sink and worktop in Lava Rock, a deep almost basalt colour that works really with reclaimed and weathered wood fronts. Ask too about the brand's charging hot-spot that can, in conjunction with a dongle, charge devices directly from its surface. It costs from about €380 per linear metre. Wicklow-based OBRE and Limerick-based Pennywell and OBRE as well as Alwood in Lurgan, Co Armagh, are just some of the many suppliers in the country. obre.ie; pennywell.ie; alwood.co.uk

Burnished brass

HD BIC
Kitchen
counters
Bert and
May

London-based Bert & May's Forge kitchen is a metal-head's dream scene. It can feature burnished brass cabinetry or islands, something that has been trending for a while or that far more fashion forward choice of burnished copper, a patinated cabinet and door front in a warm terracotta that is topped with dark grey polished concrete waterfall counters. It's smart and feels far less built-in than more traditional styles. Prices for the kitchen start from about €35,000. Prices at Ashbourne-based Concrete Design Studios start from €600 per linear metre and you can see their work in Rockets, on the seafront in Dun Laoghaire and also at Outhaus in Santry. Tyrone-based Donnelly Polished Concrete can supply and fit countertops from €3,000 upwards depending on size, location and sink and hob detailing. bertandmay.com; concretedesignstudios.ie; donnellycpc.com

Seamless

HD BIC
Kitchen
counters
Bulthaup

If you fancy a seamless look to countertops on a large sculptural monobloc island then Richard Fagan of Bulthaup Hanover Quay who designed the unit pictured, suggests stainless steel or laminate surfaces and edges that can be joined totally seamlessly using laser technology. The edges are then skilfully and carefully polished by hand to create a piece that feels almost sensual to the touch. Prices start at approximately €9,375 per metre and the design is available in eight laminate colours. The pictured island worktop costs about €37,500, excluding fitting, and does not include the storage below or to the working side of the kitchen and forms part of the overall design by Maria MacVeigh. The floor was supplied by Antica. bulthaup-hannoverquay.ie; mariamacveigh.com; antica.ie

Kitchen
counters
Dekton
Stone
Counters

Dekton

Dekton is a very hard-working countertop material that is a blend of quartz and the materials made to make glass and porcelain, baked at kiln level temperatures. It has zero porosity and is heat-proof, stain-proof and scratch-proof. Stone Surfaces sells a range of about 15 colours in stock with a further 15 available to order. Soke, pictured is a pale cement-look flooring that has been aged to appear cracked. It is available in 8mm, 12mm or 20mm thick options. The cost for the material is from €265 per sq m. This includes vat but does not include fabrication or fitting. [stonesurfaces.ie](#)

HD BIC
Kitchen
counters
Abimis
stainless
steel

Stainless steel

Stainless steel countertops are enjoying a revival for their durability and their ease of cleaning. The Milan, pictured, is a kitchen design by Italian firm Abimis, that shows a fresh way to work the material, teaming the sanitized look of the steel with bold under-counter colour. Dublin 12-based Shortt Stainless Steel is one fabricator that may be able to deliver something similar. Showtime Essential Kitchen Products also sells several ultra contemporary takes on stainless kitchens and countertops. [shorttstainless.com](#); [showtimekitchens.ie](#); [abimis.com](#)

systeem bestaat uit losse units, zodat de klant zijn eigen kast kan samenstellen.

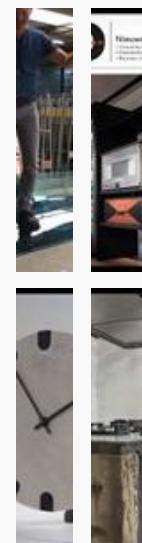

Het Cold Control System wordt aangeboden in de vorm van rvs units met de naam AISI 304. Abimis ontwerpt haar producten eigenlijk altijd met de professionele markt als inspiratiebron. Ook dit keer. De koeltechnologie van het nieuwe systeem komt uit de markt voor grootschalige catering.

OTTOBRE - MAISON & JARDIN

ABIMIS

The cover of the October 2018 issue of *Maison & Jardin Magazine* features a photograph of a modern interior space with exposed brick walls, large windows, and a rustic wooden cabinet. A brown leather armchair and a round coffee table with books are in the foreground. The title "MAISON & JARDIN magazine" is prominently displayed in large orange letters across the top. Below the title, the date "Octobre 2018" is visible. The magazine highlights several features: "ET TOUJOURS... PORTRAITS D'ARTISTES" (left), "INTÉRIEUR D'AILLEURS" (center), "ALBERTO PINTO NOUS INVITE AU MEXIQUE" (right), "LA RÉUNION INTENSEMENT VOTRE" (bottom right), and "MÉTAL ET BOIS L'ASSOCIATION PARFAITE" (bottom). A barcode and pricing information are at the bottom left.

Libera es una librería componible magnética en madera y metal barnizado. Los elementos han sido realizados con ángulos de 45° o 90° y se fijan entre ellos mediante un sistema magnético que permite la máxima libertad compositiva. Producida por Ronda Design representa una síntesis de funcionalidad y estética.

De la cocina a la mesa

Espai Rò expone "Dalla cucina alla tavola", muestra dedicada al diseño y la gastronomía. En ella se han seleccionado algunos objetos y piezas de mobiliario representativos de la mirada personal de los que componen el espacio, alrededor del mundo de la comida, entre los que destaca especialmente la colaboración de la firma de cocinas italiana Abimis, que traslada la alta calidad y la tecnología de las cocinas profesionales de acero inoxidable al ámbito doméstico. La exposición tiene como protagonista la cocina Ego de Abimis, diseño de Alberto Torsello, una isla realizada en acero inoxidable, material característico de las cocinas profesionales de hoteles y restaurantes. Merecen mención aparte la cubertería de Cleto Munari diseñada por Carlo Scarpa, el aparador Hommage de la firma suiza Röthlisberger Kollektion diseño de Atelier Oí o la librería Pensile diseño de A. & P. G. Castiglioni de Karakter Copenhagen. La exposición, abierta al público, cuenta con un total de 41 piezas de firmas como Mingardo, PP Möbler, Davide Groppi, When Objects Work, Moroso, Venini, además de las antes mencionadas Abimis, Cleto Munari, Röthlisberger Kollektion o Karakter-Copenhagen.

Inovativni rashladni sistem kompanije ABIMIS

Posted on [November 2, 2018](#) | [Leave a comment](#)

Kvalitetni recepti zahtevaju kvalitetne sastojke...

U našem slučaju radi se o modelu koji omogućuje čuvanje hrane i pruža veliku vrednost generalnom činu kuvanja, posebno u slučaju kada se ono pridržava svih fundamentalnih pravila vezanih za higijenu, zdravlje i bezbednost.

Tokom dogadaja Salone del Mobile 2018., kompanija Abimis predstavila je svoj novi sistem za čuvanje namirnica u vidu Cold Control System, frižidera iz visokotehnološke linije potpuno prilagođljivih jedinica, koje mogu biti modifikovane u terminima finiša, veličina i konfiguracija, koje su unikatno odredene i komponovane radi olakšanog pristupa eksterinim panelima, omogućujući modulaciju temperature u različitimodeljima, čiji se status može pratiti sve vreme.

Zahvaljujući novom Cold Control System frižideru, koji na najbolji način koristi tehnologije implementirane na velikoj skali u ketering industriji, kompanija Abimis nastavlja sa svojim planom unošenja sveta profesionalnih kuhinja u domaće uslove, čineći svakodnevni čin kuhanja unikatnim u privatnim domovima, najboljim i najpouzdanijim instrumentima.

Pojava, jednostavnost i mekane siluete, zajedno sa materijalima kao što je AISI 304 nerđajući čelik, ostaju identični kao i u ostalim Abimi skuhinjama. Pristup zdravlju i higijeni ostaje takođe ključna stavka kao i u svim linijama ovog brenda, obeleženim striktnim standardima, savršeno uklopljenih i funkcionalnih vrata, bez oštih ivica, zaduženih za sprečavanje prodora bakterija i prljavština, uokvirujući čitav proces čišćenja.

Cold Control System frižideri sastoje se od višeodeljenja, od kojih je svako odvojeno od sledećeg i funkcioniše pod različitim temperaturama, u dizajnu kreirano radi pametnog, savršeno organizovanog čuvanja hrane, na primer, mesa i ribe odvojenih od povrća, voća, mleka i slično, radi izbegavanja kontaminacije. Sve police unutar ovih uredaja mogu biti izvučene kako bi osigurale maksimalnu pristupačnost i poboljšale prostornu organizaciju. Poslednje, ali ne i najmanje važno jeste to što unutar komora postoji ventilacioni sistem koji garantuje identične temperature širom frižidera.
